7. Australian Biosecurity and Customs Compliance 29

WiseTech Academy Catalogue of courses for freight forwarding and logistics industry

The courses

The WiseTech Academy (WTA) courses available are broken into seven different categories.

Categories 4 and 5 are available within the WTA Subscription Model.

1. **The Airfreight IATA Dangerous Goods Accreditation courses**
2. **The Sea freight IMDG Dangerous Goods Accreditation courses**
3. **The 49CFR Land and awareness Accreditation courses**
4. **The Diploma of International Freight Forwarding available within a Subscription model**
5. **The Industry courses available within a Subscription model**
6. **The corporate compliance courses**
7. **The Australian Biosecurity and Customs Compliance courses**

The following is a list of the courses including their descriptions under each category

1. The Airfreight IATA Dangerous Goods Accreditation courses

The three airfreight Air Freight Dangerous Goods IATA Accreditation courses are listed below. These are priced separately and not available within the Subscription model.

<p>Preparing DG (Hazmat) Consignments (excluding Radioactive) for shippers, freight forwarders, cargo agents, manufacturers and exporters – IATA Approved</p>	<p>Course type Accreditation: US\$290</p>
<p>This course meets ALL "Initial" and "Recurrent" training requirements for shippers and freight forwarders preparing dangerous goods consignments.</p>	
<p>Preparing DG (Hazmat) Consignments (All classes) for shippers, freight forwarders, cargo agents, manufacturers and exporters- IATA Approved</p>	<p>Course type Accreditation: US\$290</p>
<p>This course meets ALL "Initial" and "Recurrent" training requirements for shippers and freight forwarders with responsibilities that include preparing dangerous goods/hazmat consignments intended for air transport in accordance with ICAO Part 1, Chapter 4 of the technical instructions, 49CFR Part 172 Subpart H, and function 7.1 in IATA's "Dangerous Goods Training Guidance".</p>	
<p>Accepting DG (Hazmat) Consignments for freight forwarders, shippers, airlines, cargo terminal operators, ground handling agents, freight forwarders, cargo agents and consolidators – IATA Approved</p>	<p>Course type Accreditation: US\$290</p>
<p>This course meets ALL "Initial" and "Recurrent" training requirements for airline cargo agents, airlines, cargo terminal operators and ground handling agents, with responsibilities that include processing or accepting dangerous goods/hazmat consignments intended for air transport in accordance with ICAO Part 1, Chapter 4 of the technical instructions, 49CFR Part 172 Subpart H and function 7.1 and 7.3 in IATA's "Dangerous Goods Training Guidance".</p>	

2. The Sea Freight IMDG & 49CFR Dangerous Goods Accreditation courses

<p>IMDG Code – Packing, preparing and accepting Dangerous Goods (Hazmat) consignments for freight forwarders, consolidators, cargo agents, and shippers</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide shippers, consignors, freight forwarders, manufacturers, consolidators, packers and handlers loading/unloading cargo transport units, tanks and bulk containers operations with extensive knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code when preparing and/or handling consignments of non-bulk and bulk dangerous goods /hazmat being shipped by sea transport.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking refresher training to renew their certificate.</p>	
<p>IMDG Code – Preparing non-bulk Dangerous Goods (Hazmat) consignments for shippers, consignors, manufacturers and exporters</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide shippers and freight forwarders with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code when preparing consignments of dangerous goods being shipped by sea transport.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking refresher training to renew their certificate.</p>	
<p>IMDG Code – Packing and loading/unloading Dangerous Goods (Hazmat) consignments into cargo transport units</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide you with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code if you pack or are involved in handling Dangerous Goods/Hazmat cargoes being sent by sea transport.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking to renew their accreditation.</p>	
<p>IMDG Code - Senior Dangerous Goods (Hazmat) managers and Dangerous Goods Safety Advisors (DGSAs)</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide you with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code if you pack, or are involved in handling Dangerous Goods/Hazmat cargoes being sent by sea transport.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking to renew their accreditation.</p>	

<p>IMDG Code – Tank and bulk container operations</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide shippers, consignors, freight forwarders, manufacturers and exporters with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code when preparing consignments of bulk dangerous goods /hazmat being shipped in tanks and bulk containers by sea transport.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training or those seeking refresher training to renew their certificate.</p>	
<p>IMDG Code - Vessel operations for ship operators and crew</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide ship operators and crew with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code to the management of operations of a ship carrying dangerous goods/hazmat.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking refresher training to renew their certificate.</p>	
<p>IMDG Code - Ship loading and unloading operations for stevedores and dockside workers</p>	<p>Course type Accreditation: US\$130</p>
<p>This course will provide stevedores, dockside workers, and other personnel with direct responsibilities for loading and unloading dangerous goods/hazmat cargoes from vessels with the knowledge to interpret and apply the requirements of the International Maritime Dangerous Goods or IMDG Code.</p> <p>This course is designed for personnel who have either no previous dangerous goods/hazmat compliance training, or those seeking refresher training to renew their certificate.</p>	

3. The 49CFR Land Transport and Awareness Accreditation courses

Hazmat Land Transport 49 CFR	Course type Accreditation: US\$290
<p>This is a comprehensive course providing essential knowledge to interpret and apply the requirements of 49 CFR when preparing and/or handling consignments of hazardous materials being shipped by land transport. It is designed for personnel who have either no previous hazardous materials compliance training, or those seeking refresher training to update their knowledge and renew their certificate.</p>	
Hazmat General Awareness 49 CFR	Course type Accreditation: US\$84
<p>Get familiar with the rules and regulations issued by the Departments of Transportation and Homeland Security concerning the transportation of hazardous materials. Designed to raise awareness and ensure compliance with hazmat regulations, this course equips participants with essential knowledge regarding the safe handling, transportation, and management of hazardous materials.</p>	

4. The Diploma of International Freight Forwarding (available within Subscription Model Pricing)

<p>Introduction to international freight forwarding</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course will provide you with a comprehensive understanding of international freight forwarding, including the modes of international transport, cargo packing and stowage, and considerations for determining the most appropriate methods of transport.</p>	
<p>Sea transport in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>Throughout this course, you will learn about the various components of the sea freight industry, including an introduction to role of sea transport in global supply chain, containerization, organizations and regulations in sea transport, safety and security at sea, ship types and their cargo, shipping methods and services, world ports and operations, sea transport documentation, and routing and ocean freight pricing.</p>	
<p>The types and functions of international sea containers</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course, you will learn about the various types of containers used for sea freight transport, including standard containers, open-top containers, flat-rack containers, refrigerated containers, and more. You will also learn about the packing and minimizing risk for containerized cargo transport, including the proper handling and securing of cargo within containers, the international organizations and conventions that have been established to ensure safe and efficient container transport, and waybills, accompanying documents, and pricing for sea freight container transport.</p>	
<p>Air transport in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course you will learn about the various components of air cargo operations, including regulatory bodies and international conventions, types of air freight forwarders, geography and air cargo rules, air cargo aircraft and unit load devices (ULDs), air cargo handling, acceptance, and security, air cargo consolidation, air cargo automation and CASS, air cargo rates and charges, the air waybill, and air chartering.</p>	
<p>Road transport in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course, you will learn about the various components of road transport in the international supply chain, including the International Road Transport Union (IRU) the leading organization in the road transport industry, the geography of road transport various types of road vehicles and services available, as well as the legal requirements for transporting goods by road. Additionally, you will learn about the importance of material-handling equipment in road transport and how technology is transforming the industry.</p>	

<p>Rail transport in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course you will learn about the various components of rail transport in the international supply chain, including rail car types, the geography of rail transport, operational procedures of rail transportation, the importance of waybills and tariffs for international rail transport, as well as the legal requirements for transporting goods by rail.</p>	
<p>National & International carriage by inland waterway</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course is designed to provide you with a comprehensive understanding of inland waterway transport, its geography, and the various types of barges used in this mode of transport.</p> <p>You will study water transport along the three great canals (Suez, Panama, and Kiel), in addition to the six major navigable inland waterways systems. These waterways form part of international supply chains, particularly when multimodal transport is used for cargo movement.</p> <p>Additionally, you will learn about the legal requirements of transport by inland waterway, the different documents required for the carriage of goods by inland waterway, and technology developments in this mode of transport.</p>	
<p>Multimodal transport in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course, you will learn about the various components of multimodal transport, including the types of multimodal transport, networks, and usage case studies, the importance of MTOs and the various services they provide, as well as the legal requirements for transporting goods using multimodal transport. Additionally, you will learn about the planning and execution of multimodal transport shipments and the safety, security, and insurance considerations associated with this mode of transportation.</p>	
<p>International logistics, warehousing, and distribution</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course will provide you with a comprehensive understanding of logistics and supply chain management, including 3PL structures, logistics functions, warehousing types, warehousing functions, and transportation in logistics.</p> <p>You will explore the link between logistics and inventory management, packaging in logistics, information handling, and automation, including the use of technology to manage logistics operations.</p>	
<p>Understanding Incoterms® 2020</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course will provide you with a comprehensive understanding of the Incoterms® 2020 rules, including their use and application in international trade. You will learn about the different Incoterms® 2020 rules, including their definitions and how they allocate responsibilities between buyers and sellers.</p> <p>In addition, the course will cover the implications of using different Incoterms® 2020 rules for costs, risk, and insurance, as well as how to select the most appropriate Incoterms® 2020 rule for a particular transaction.</p>	

<p>Safety and security in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>The safety and security of all involved in the supply chain is of paramount importance for successful international trade. This course provides an in-depth exploration of the safety risks in the movement of international cargo, including environmental factors, personnel, facilities, information, and equipment, right through to more obvious risks, such as terrorism.</p> <p>You will examine the nature of these risks and how to identify them in various stages of the supply chain and, on completion, understand the role of international bodies in security and safety management, including the World Customs Organization, World Health Organization, and International Maritime Organization. You will also know the various international frameworks and systems in place to manage security and safety risks in the supply chain.</p>	
<p>Dangerous goods (Hazmat) awareness in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course will provide you with a comprehensive understanding of the governance and framework for handling consignments of dangerous goods in the supply chain, including the roles and responsibilities of the parties in the transport chain.</p> <p>You will also study the importance of training in dangerous goods handling and the different classifications of dangerous goods, the different types of packages and containers used for dangerous goods, and the methods of packing, as well as the requirements for marking, labeling, and handling dangerous goods.</p>	
<p>Global customs conventions and procedures</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>In this course you will learn about the role of customs in international trade, including the importance of customs compliance and the different customs transit procedures, and will study the various storage options available, including customs bonds, warehouses, and free zones, as well as the customs clearance process and the different types of customs duty and taxes.</p> <p>In addition, the course will cover the origin of goods and the procedures for determining tariff classification, as well as the customs debt, guarantees, and payment procedures.</p> <p>You will also study the various prohibitions and restrictions that apply to the movement of goods, including UN Security Council resolutions on sanctions. Finally, the course will cover the export and exit procedures, and freight forwarder liability.</p>	
<p>Reducing Greenhouse Gases in the global supply chain</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>
<p>This course is intended to help you understand how international logistics contributes to climate change and the regulatory measures taken by companies, in collaboration with governments, to mitigate threats of global warming and implement a way forward via international agreements.</p> <p>Knowing the causes and effects of climate change can help you understand how your business activities may be detrimental and how these may be measured and managed in a manner that is in the best interests of your business.</p>	
<p>Transport Logistics Contracts, Insurance, Liability and Risk</p>	<p>Course type Diploma: US\$40.00 or Subscription Model</p>

In this course you will examine the various risks and liabilities associated with transport logistics contracts. You will also study the different types of insurance policies available to protect against these risks, including marine cargo insurance policies and general liability insurance.

In addition, the course will cover sales and service contracts, international trade documentation, International Freight Forwarder standard terms and conditions, and the legal aspects of transport logistics contracts, including the importance of compliance with international regulations and the consequences of non-compliance.

Information and communication technologies in international freight forwarding

**Course type
Diploma: US\$40.00 or
Subscription Model**

The course provides an understanding of the role of technology in modern supply chain management. The course starts with an introduction to information and communication technology, including its impact on businesses and how it affects the global supply chain. You will learn about the fundamentals of computers and their environments, the use of data, information, and knowledge in international supply chains.

You will learn about the principles of networking and data sharing, including the use of web apps and telecommunications in the supply chain. Other topics covered in the course include electronic data interchange and value-added networks, barcoding and similar technologies, eCommerce, and an introduction to cybersecurity.

5. The industry courses catalogue available within Subscription Model Pricing

5.1 Induction level courses

Basic Supply Chain Math	Course type Industry short: Free or Subscription Model
Get acquainted with the basics of calculating cargo dimensions, mass, weight, or volumetric weight for international shipments.	
Geography For Supply Chain Logistics	Course type Industry short: Free or Subscription Model
Learn your way around the globe and understand how geography influences the global supply chain using the main ports as your guide.	
Introduction to global supply chain security	Course type Operator Level short course: US\$8.00 or subscription
Understand regulatory bodies responsible for, and programs that manage security in the global supply chain.	
Incoterms® 2020 Introduction	Course type Operator Level short course: US\$8.00 or subscription
Build your understanding of the methodology of Incoterms® 2020 and how they apply to buyers and sellers.	
Introduction to logistics and supply chain management	Course type Operator Level short course: US\$8.00 or subscription
This course provides an introduction to logistics and supply chain management.	
The basics of ocean freight forwarding	Course type Operator Level short course: US\$8.00 or subscription
Understand the basics of sea freight forwarding including the role of shipping in international trade, shipping lines, and ocean vessels.	
The basics of international port operations	Course type Operator Level short course: US\$8.00 or subscription
This course addresses the roles and functions of a shipping port and its relationship with the global supply chain.	

The Basics of Air Cargo Forwarding	Course type Operator Level short course: US\$8.00 or subscription
The air cargo industry has many rules and regulations and terms that are difficult to understand. Learn the basics of air cargo forwarding for free.	
Basic Warehouse Operations	Course type Operator Level short course: US\$8.00 or subscription
Learn warehouse operations fundamentals: types, processes, features, putaway, storage, receiving, picking, dispatch, cross-docking, and equipment.	
Warehousing 101	Course type Operator Level short course: US\$8.00 or subscription
This course is used to assist learners understand the basic concepts and processes used within Warehousing	

5.2 Air freight Forwarding short courses

Air cargo classification rates and charges	Course type Operator Level short course: US\$8.00 or subscription
Air cargo operations are a major component of the world's export and import transportation services and continue to grow at rates exceeding any other transportation mode.	
This course will provide you with valuable insights into the classification and pricing of air cargo. You will learn about chargeable weight, all the specifics of freight rates and how the airline and forwarder negotiate their rates and contracts.	
Air cargo documentation including the AWB	Course type Operator Level short course: US\$8.00 or subscription
The understanding of international security conventions, policies, and regulations are paramount to the mitigation and risk management in relation to security and safety in International Freight Forwarding and the greater supply chain.	
This micro course is designed to cover a brief overview of the aspects an operator with a logistics, international forwarding or brokerage business should understand to know where to find information about international security programs.	

<p>Introduction to airfreight consolidations</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Consolidating cargo for air transport is not simply pack it, ship it, and it's done. More often than not a single consignment won't fill an aircraft's cargo hold on its own. Saving money on unused space requires skill in consolidating cargo from multiple buyers or consignees into one full shipment.</p> <p>You have to know what commodities can be shipped together and what can't. You also need to know what hazards any shipment might cause another neighboring consignment and what needs to be packed on the bottom that's heavier than what needs to be packed on top that's lighter.</p>	
<p>Air cargo aircraft and unit load devices (ULDs)</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Air cargo operation is currently outgrowing every other mode of transportation involved in the export and import of goods around the world. For this reason alone, sound knowledge and skill set in this burgeoning area will take you far.</p> <p>This course will equip you with just that; priceless insights into air cargo, and how it's transported. You'll learn about the many different aircraft used for global air freight and the packing options available for each.</p>	
<p>Understanding Air Chartering</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Gain valuable insights into this common practice and familiarize yourself with the roles of the carrier, forwarder, and charter broker.</p> <p>Course learning includes the types of aircraft used for chartering air freight around the world as well as the types of cargo suited to this mode of transport. Lastly, the curriculum explores the costing methods involved in chartering air freight services.</p>	
<p>Commercial and operational impact of COVID 19 on airfreight forwarding</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Secure valuable insights into the changes to the air cargo industry which were caused by the COVID-19 pandemic.</p>	

5.3 Sea freight Forwarding short courses

<p>Sea Transport Bills of Lading</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Bill of Lading is one of the most important documents in international trade. It plays a vital role in ensuring the smooth and secure movement of goods from one port to another, facilitating trade and commerce across the globe.</p> <p>This course will provide you with a comprehensive understanding of the purpose and function of the Bill of Lading in sea transport, the different types available, and how to use them effectively in your international trade transactions.</p>	
<p>Ship types, their features, and cargoes</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>This course provides a comprehensive understanding of major ships, their sizes, cargoes, in global seaborne trade.</p> <p>It covers the structural and functional elements of cargo ships, different tonnage measurements, and their application in ship classification.</p>	
<p>Packaging in logistics</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Packaging is a vital component of the logistics shipment process. Products need to be preserved and protected in order to reach their destination in perfect condition. Packaging is also used to position, differentiate, and sell the product, using materials that comply with regulations.</p>	
<p>Packing containers in accordance with the CTU code</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>This course covers the CTU Code as it relates to packing goods for multi-transportation in cargo transport units. It includes selection of appropriate CTUs and the checks required before and after packing.</p>	

5.4 General Import and Export Freight Forwarding air and sea combined

<p>Export Financing</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>This course focuses on one of the most important traditional methods of payment for international trade transactions – Documentary Letters of Credit (DLC), also referred to as simply Letters of Credit or LC.</p>	

<p>Introduction to US Export Controls</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>This course is an overview of the types of controls and procedural requirements imposed by the US governments and certain other export-related activities and parties. Coverage includes the respective export-related responsibilities and regulatory requirements of the various agencies</p>	
<p>US Export Administration Regulations License Exceptions</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Learn under what conditions you do not need an export license.</p>	
<p>Understanding Free Trade Agreements</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Describes the different types / levels of FTA (unilateral, bilateral and multilateral, regional, special, customs unions, common markets, economic union)</p>	
<p>Freight forwarder greenhouse gas emissions reduction strategy</p>	<p>Course type Operator Level short course: US\$8.00 or subscription</p>
<p>Implementing an Emission Reduction Strategy requires a technical understanding of emissions and a grasp of how new business practices take root in an organization.</p> <p>In this short course, James Hookham, Chairman of the Global Shippers Forum, provides an overview of:</p> <ul style="list-style-type: none"> • how organizations create accountability and sustain change • measuring and monitoring emissions • reporting to stakeholders on emission benchmarks and targets <p>The course will cover additional challenges for international logistics businesses, including accounting for emissions generated by third parties and off-site emissions.</p>	
<p>Introduction to Air and Sea Containerization, Packing and Stowage of Cargo</p> <p>*Please note this short course has been extracted from the longer “Plan for International Trade” Course. (Listed below)</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>Hands-on practical knowledge for dealing with cargo containerization applications for both air and sea transport.</p> <p>You will learn how and why cargo is packed and stowed for containerized transport, and the container options for each transport mode.</p>	

<p>Introduction to International Forwarding and Freight Calculations</p> <p>*Please note this short course has been extracted from the longer “Plan for International Trade” Course. (Listed below)</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>The information covered in this course will provide you with hands-on practical knowledge of how cargo is moved by air and by sea.</p> <p>Content includes a review of air services and sea freight shipment types and services, and an introduction to containerization. You will also learn the skills and knowledge necessary to calculate air and sea freight amounts for cargo.</p>	
<p>Introduction to International Trade and Evaluating Methods</p> <p>*Please note this short course has been extracted from the longer “Plan for International Trade” Course. (Listed below)</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>It’s easy to be confused by the sheer volume of contributing factors that must be considered during any international shipment. This is why good planning, cooperation, and communication between internal and external stakeholders are important at every stage of the supply chain.</p> <p>Planning for international trade requires not just skills but to evaluate your options regarding the movement and distribution of cargo. This short course is your first step.</p>	
<p>Plan for International Trade</p> <p>If preferred this course can be taken in three specific short course topics (as shown above)</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>The learnings you’ll take away will assist you to effectively plan for the international trade of goods by air and sea transport, from both a physical and associated documentation perspective, and how to evaluate your options when planning for the movement and distribution of cargo.</p> <p>Content covered includes the evaluation of international methods of transport, an introduction to international forwarding and freight calculations, and an introduction to containerization and packing.</p>	
<p>Safe Container Loading Practices</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>Understand the global implications of incorrect container loading and industry’s role in ensuring they maintain best practice procedures. Note while much of the content contains global information including the ICU code, the Australian National Heavy Vehicle Regulations are described. This course has six subjects.</p>	

<p>Risk management approach in the supply chain (for managers)</p>	<p>Course type Operator Level: US\$8.00 or Subscription</p>
<p>This course addresses how to manage risk and reduce the growing occurrence of accidents due to a lack of shipment and handling preparations.</p>	
<p>Understanding Cargo Tracking</p>	<p>Course type Operator Level: US\$8.00 or Subscription</p>
<p>Customers appreciate the reassurance of knowing that they have the ability to track and locate their shipment's progress at any given point and time of the transit journey from beginning to end.</p> <p>This course provides the reasons why shippers and importers need to know the status of cargo, explains the elements of a tracking system and the value of quality data, and how effective cargo tracking systems can assist manufacturers, traders, and service providers to create a resilient, competitive, and profitable supply chain.</p>	
<p>Understanding International Freight Consolidation</p>	<p>Course type Operator Level: US\$30.00 or Subscription</p>
<p>'Understanding International Freight Consolidation' defines the service offered by shipping companies and freight forwarders together with the various devices involved in grouping shipments into solitary loading devices to reduce costs and improve transportation methods.</p> <p>The course also covers methods for assembling multiple smaller shipments into one shipment for better security and more cost-efficient freight rates.</p>	
<p>Stop using the incorrect Incoterms® 2020</p>	<p>Course type Operator Level: US\$8.00 or Subscription</p>
<p>This course addresses the incorrect use of the FAS, FOB, CFR, and CIF Incoterms® 2020 rules in international trade, understanding the correct application of these terms will allow you to keep control over consignments and potentially reduce costs.</p>	
<p>The most commonly used Incoterms® 2020</p>	<p>Course type Operator Level: US\$8.00 or Subscription</p>
<p>This course is focused exclusively on EXW, FCA, CPT, CIP, DAP, DPU, and DDP rules, each term is defined in detail, and the place of delivery and risk transfer explained. Contract of carriage, customs formalities, insurance, and documentation requirements, and the seller's and Buyer's main obligations made clear.</p>	

Exporting wine globally	Course type Operator Level: US\$8.00 or Subscription
<p>This course offers a comprehensive guide to navigating the complex world of wine exportation. From understanding wine origins and certifications to mastering labeling requirements and pricing strategies, this course equips you with the essential knowledge and skills needed to succeed in the global wine market.</p>	

5.5 Logistics, distribution and warehousing

Warehousing and inventory management in logistics	Course type Operator Level: US\$8.00 or Subscription
<p>Logistics services center around warehousing and distribution. Learn about the various roles in the logistics chain and the inventory they manage.</p>	
Information handling and automation in logistics	Course type Operator Level: US\$8.00 or Subscription
<p>Information and automation. Learn how technology can accelerate certain processes in the global supply chain and help satisfy customer demand.</p>	
Packaging in logistics	Course type Operator Level: US\$8.00 or Subscription
<p>Learn about the various types of packaging in logistics and their importance in ensuring cargo always reaches its destination in perfect condition.</p>	
Modes of transportation in logistics	Course type Operator Level: US\$8.00 or Subscription
<p>Transportation plays a crucial role in the logistics chain. This course explains the modes of transportation, and containerization options available.</p>	
Third-party logistics structures and functions	Course type Operator Level: US\$8.00 or Subscription
<p>Interested in all things logistics? This introduction to third-party logistics covers purchasing, packing, transportation, and warehousing.</p>	
Basic warehouse operations	Course type Operator Level: US\$8.00 or Subscription

<p>Learn the fundamentals of warehouse operations, including the main types and attributes of warehouses, warehouse operational processes, and features and functions of key areas. Dive into the specifics of put away, storage considerations, receiving, picking, dispatch, and cross-docking processes, and familiarize yourself with the various types of manual handling equipment used in warehouses.</p>	
<p>Warehouse management - A guide to ABC Inventory Analysis</p>	<p>Course type Operator Level: US\$8.00 or Subscription</p>
