Glenn Coldham – President, CBAFF

Rosemarie Dawson – Executive Director, CBAFF

9:00 Keynote: Self-Orchestrating Supply Chain Technologies

From unmanned mobile robots in warehouses to drones for on-line fulfillment, the current supply chain is undergoing a major transformation. With the possibilities in artificial intelligence, the future supply chain holds the promise of being completely autonomous and self-orchestrated.

The supply chain of tomorrow will be leaner, faster and most importantly, self-orchestrated. This unprecedented pace of change will be driven by a few radical technologies that will be cautiously adopted by industry participants over the next 15 years.

Paul Spain – Founder and CEO, Gorilla Technology

10:00 Speed-Networking

Geoff Dolan to facilitate

10:30 Morning Tea

10:45 Blockchain Technology: The Disruptive Power it has on Businesses and the Challenge it's Creating for Lawmakers and Regulators

Blockchain has the disruptive power to allow people and businesses to transact directly anywhere in the world, bypassing banks and other traditional third parties, and creating a big challenge for lawmakers and regulators around the world. Professor Sims is leading a project funded by the Law Foundation looking at the regulation of cryptocurrencies in New Zealand and Australia

**Associate Professor Alexandra Sims
Head of Commercial Law at the
University of Auckland Business School**

11:15 What Millenials Want From Their Employer and How They Are Changing the Working Landscape

It shouldn't come as a surprise as it's been on the horizon for years, but are businesses truly prepared for the rise of millennials in the workplace? The U.S. Bureau of Labor Statistics predicts that by 2015 millennials will overtake the majority representation of the workforce and by 2030 this hyper-connected, tech savvy generation will make up 75% of the workforce.

Deloitte present the findings from their 2017 Millennials Survey.

**Lauren Foster – Associate Director, Deloitte
Tina Audehm – Consultant, Deloitte**

11:45 Supply Chain Integration, Use of Data and Error Removal

Daniel Cowie – General Manager, PortConnect
